About Kai

A dedicated technical communicator with a proven ability to convey intricate technical information effectively. He demonstrated strong problem solving skills and possesses a strong aptitude for grasping complex concepts quickly and is eager to apply his technical skills to excel as a software developer. As a continuous learner, Kai has recently acquired expertise in quality management processes to ensure customer satisfaction. His experience configuring systems, collecting project requirements, and managing stakeholder expectations demonstrates his ability to work well in a structured project environment. His adaptability and ability to quickly learn new technologies make him a valuable asset to any team. With a resilient spirit and a positive attitude, Kai is able to overcome challenges and consistently deliver results.

Experience

Veeva Japan K.K. / IT Consultant
APRIL 2023 - PRESENT, TOKYO (Ebisu)

- Collaborated with several teams on many global and local system implementation projects as a customer facing technical consultant. Has significant project experience from the perspective of various project roles.
- Utilized technical communication skills to effectively collect requirements from non-technical stakeholders through workshops.
- Quickly learned new products and business processes to successfully navigate demanding projects, demonstrating strong adaptability and resilience.
