About Kai

A dedicated and results-oriented IT Consultant with a strong foundation in technical communication and a heartfelt interest in utilizing technology to drive business success. With a thirst for problem-solving, Kai thrives in fast-paced environments and enjoys collaborating with cross-functional teams to deliver solutions. Kai is eager to be able to apply technical knowledge, to contribute to the success of businesses.

As a continuous learner, Kai has recently acquired expertise in quality management processes to ensure customer satisfaction. His experience in configuring systems, collecting project requirements, and managing stakeholder expectations demonstrates an ability to work well in a structured project environment. His adaptability and ability to quickly learn new technologies make him a valuable team member. With a resilient spirit and a positive attitude, Kai is able to overcome challenges and consistently deliver results.

Experience

Veeva Japan K.K. / IT Consultant

APRIL 2023 - PRESENT, TOKYO (Ebisu)

- Successfully implemented Veeva's cloud-based solutions for SMB and enterprise life sciences companies, collaborating with senior consultants and project managers.
- Gathered client requirements, participated in business process discovery workshops, and configured Veeva products to meet specific needs.
- Created and maintained system documentation to ensure successful deployments.
- Articulated complex technical and business concepts to diverse audiences.
- Built and tested solutions, trained customers, and provided ongoing subject matter expertise.
- Honed analytical thinking, problem-solving, and project management skills in a fast-paced environment.
- Collaborated with several teams on many global and local system implementation projects, effectively collecting requirements from non-technical stakeholders through workshops.
- Quickly learned new products and business processes to successfully navigate demanding projects, demonstrating strong adaptability and resilience.
